making mobility happen

Step aboard: We take your development all the way.

From concept to series production.

L1 - Freight & maintenance vehicles

This line delivers effective solutions for freight and work vehicles. From freight wagons and locomotives to construction and maintenance vehicles, we develop technology that works reliably and supports efficient operations.

L2 - Passenger transport

This line brings mobility to life. For long-distance and regional services as well as historic vehicles, we combine comfort, safety and modern technology in solutions that meet the needs of passengers and operators alike.

L3 - Development

This line combines our individual areas of expertise into an integrated service offering that moves your project forward safely and efficiently, from the first idea to final implementation.

L4 - Infrastructure

This line keeps operations running smoothly. Reliable infrastructure, short delivery and production lead times, and tailored solutions provide the basis for efficient processes and predictable projects.
